

Sample Bug Report

Bug ID	BUG-001
Title	Account lock not enforced after multiple invalid login attempts
Module	Authentication / Login
Environment	Chrome 120, Windows 11
Build Version	v2.3.1
Severity	High
Priority	High
Reported By	Nilava (QA Automation Engineer)
Date	01-Mar-2025
Steps to Reproduce	1. Navigate to login page. 2. Enter valid username. 3. Enter incorrect password multiple times. 4. Retry login using correct credentials.
Expected Result	
Actual Result	After multiple failed login attempts, the system should display an account lock message and prevent login for 1 hour. The expected account lock message ("Your account has exceeded allowed number of login attempts. Please try again in 1 hour.") is not displayed. When valid credentials are entered after multiple failed attempts, the system allows login and redirects the user to the dashboard instead of enforcing the lock.
Additional Notes	Potential security issue since account lock mechanism is not enforced.

Sample Bug Report

Bug ID	BUG-002
Title	Cart total not updating after item removal
Module	Shopping Cart
Environment	Firefox 121, macOS Sonoma
Build Version	v2.3.1
Severity	Medium
Priority	Medium
Reported By	Nilava (QA Automation Engineer)
Date	01-Mar-2025
Steps to Reproduce	1. Add multiple items to cart. 2. Remove one item. 3. Observe cart total value.
Expected Result	Cart total should update immediately after item removal.
Actual Result	Cart total remains unchanged until page refresh.
Additional Notes	Likely UI state synchronization issue.

Sample Bug Report

Bug ID	BUG-003
Title	API returns 500 error when optional field is empty
Module	User Profile API

Environment	Postman / API Testing
Build Version	v2.3.1
Severity	High
Priority	High
Reported By	Nilava (QA Automation Engineer)
Date	01-Mar-2025
Steps to Reproduce	1. Send POST request to /api/profile endpoint. 2. Leave optional field 'middleName' empty. 3. Submit request.
Expected Result	API should accept empty optional field and return 200 response.
Actual Result	Server returns 500 Internal Server Error.
Additional Notes	Backend validation not handling null values correctly.

Sample Bug Report

Bug ID	BUG-004
Title	No visual feedback after user interaction (Like button)
Module	Social Feed / User Interaction

Environment	Chrome (Latest), Android / iOS
Build Version	v2.3.1
Severity	Medium
Priority	High
Reported By	Nilava (QA Automation Engineer)
Date	01-Mar-2025
Steps to Reproduce	1. Navigate to social feed page. 2. Click on “Like” button for any post 3. Observe button state
Expected Result	After clicking "Like", the button should immediately change state (color/highlight) and show updated like count .
Actual Result	No immediate visual feedback is provided after clicking “Like”. User is unsure whether the action was successful
Additional Notes	Interaction feedback is missing, which may cause repeated clicks or inconsistent user behavior
UX Impact	User may feel uncertain whether their action was registered, leading to confusion, repeated clicks, and poor user experience
